## **The Eden Project** GLOBAL PEACE INITIATIVE

A Message from Its President:

With the inability to control terrorism in evidence, worldwide, the need for an immediate solution to long standing cultural problems is now undeniable. Without this solution, it's only a matter of time before weapons of mass destruction enter this equation, along with their eventual use.

Historically, force and intimidation have proved effective in suppressing dissent. However, with the growing availability of high tech weaponry all this has now changed. Until the world comes to this realization and acts accordingly, we will continue to be at direct risk from all that we forcibly disenfranchise. Hence, we better find a way to resolve cultural disputes now, before it is too late.

In the past, no one understood how to break this cycle of violence. However, thanks to an advancement in "knowledge theory," as it is embodied in the **Eden project**, we now have a way.

This promise finds application through a unique formula that gives equal voice to all cultures and the ideologies that comprise them. Hence, it affords everyone the level of dignity that is consistent with their birthright as a human person. By so doing, it successfully promotes the needed tolerance central to establishing the necessary dialogue required to defuse those issues which, if left unchecked, are poised to destroy all life on earth.

In addition to its humanitarian effort, which is of unprecedented importance, the **Eden project** is also structured to be self-sufficient -- once it is up and running. Also, as a cooperative venture between the not-for-profit sector and the World's business community, it is geared to provide enormous economic potential for all who choose to partner with it. Being global in scope, it will afford unparalleled opportunities in the world of education, publishing, communications, audiovisual, etc. If you are interested in participating, please act accordingly.
